

MAIL-ASSURE

Why our Clients Choose our Managed Mail-Assure Solution

Other Anti-Spam Software:

- Store and forward introduces delays in delivery of emails.
- Only filters inbound emails, not outbound, which could cause your company to be blacklisted.
- Only quarantines email on a group basis not on an individual employee basis.
- Complex and expensive licensing models.

Managed Mail Protection:

- Protect against ransomware, phishing, virus, and malware attacks.
- Queues received email should your email server go offline.
- Includes full scanning on inbound and outbound mail.
- Priced per mailbox.
- Managed by IT Experts.

Once onto the desktop, Spam leaves your entire business at the mercy of an employee doing the “right thing”. Don’t let your Spam cripple your business, let us keep you protected with Pro-Multis’ Managed Mail-Assure solution.
